

EFFICIENT ENERGY MANAGEMENT POLICY

UNIVERSITI
TEKNOLOGI
PETRONAS

Universiti Teknologi PETRONAS (UTP) is committed to ensure continuous implementation and improvement of energy performance. It aims to minimise the impact of operations on the environment by efficient and economical utilisation of energy in UTP.

With the commitment of University Executive Management Committee, UTP will;

- Comply to the Efficient Management of Electrical Energy Regulation 2008.
- Promote efficient utilisation of energy and discourage wasteful and unproductive patterns of energy consumption among UTP community.
- Ensure that the development and operation of infrastructures are in accordance with appropriate legal requirements, energy efficient requirements and industry best practices.
- Provide necessary resources and organisation and where appropriate engage with external parties on relevant energy matters.
- Ensure continual improvements of its sustainable energy management and performance through leveraging of people, processes and technology.

UTP expects its community to strictly adhere to this policy at all times.

Prof Dr Mohamed Ibrahim Abdul Mutalib
Vice Chancellor / CEO
Universiti Teknologi PETRONAS
